International Journal of Science Education

Editor **J. K. Gilbert**, University of Reading, UK

Regional Editors **D. F. Treagust**, Curtin University of Technology, Australia
K. Fisher, San Diego State University, CA, USA
J. Wandersee, Louisiana State University, Baton Rouge, USA

Assistant Editor **K. Johnston**, University of Liverpool, UK

Consultant Editor **R. Kempa**, University of Keele, UK

Editorial Board

E. Abrams, University of New Hampshire, Durham, USA
R. Abrams, University of Califoria, Santa Cruz, CA, USA
P. Adey, Kings College, London, UK
C. Ault, Lewis and Clark College, Portland, OR, USA
B. Becker, University of California, Irvine, USA
C. Bereiter, University of Toronto, Canada
C. Boulter, University of Reading, UK
D. Brown, University of Illinois, Champaign, IL, USA
W. Carlsen, Cornell University, Ithaca, USA
A. Cavallo, University of California, Davis, USA
E. Chiapetta, University of Houston, TX, USA
B. Coppola, University of Michigan, Ann Arbor, MI, USA
M. Cox, Kings College, London, UK
Z. Dagher, University of Delaware, Newark, DE, USA
O. de Jong, Utrecht University, The Netherlands

Vol. 22 No. 1 January 2000

DISTINGUISHED PAPER SERIES

Mental models, conceptual models, and modelling
I. M. Greca and M. A. Moreira 1

ARTICLE

A biological basis for generative learning in technology-and-science Part II: Implications for technology-and-science education
L. Schaverien and M. Cosgrove 13

RESEARCH REPORT

Constructivist learning environments in a cross-national study in Taiwan and Australia
J. M. Aldridge, B. J. Fraser, P. C. Taylor and C.-C. Chen 37

Learners' knowledge in optics: interpretation, structure and analysis
I. Galili and A. Hazan 57

Exploring the relationship between subject knowledge and pedagogic content knowledge in primary teachers' learning about forces
J. Parker and D. Heywood 89

ERRATUM 113

Vol. 22 No. 2 February 2000

RESEARCH REPORTS

Analysis of a student-generated inquiry discussion
E. H. van Zee 115

Girls and physics: teaching and learning strategies tested by classroom interventions in grade 11
P. Labudde, W. Herzog, M. P. Neuenschwander, E. Violi and C. Gerber 143

Teaching investigative science: preliminary theorizing from the shared reflections of teachers
J. G. McNally 159

Genes, chromosomes, cell division and inheritance – do students see any relationship?
J. Lewis and C. Wood-Robinson 177

Transforming science and learning concepts of physics teachers
F. Flores, A. López, L. Gallegos and J. Barojas 197

Prospective *gymnasium* teachers' conceptions of chemistry learning and teaching
T. Koballa, Jr., W. Gräber, D. C. Coleman and A. C. Kemp 209

Vol. 22 No. 3 March 2000

RESEARCH REPORTS

What is the relationship between social constructivism and Piagetian constructivism? An analysis of the characteristics of the ideas within both theories
N. Marín, A. Benarroch and E. J. Gómez 225

Learning science through contexts: helping pupils make sense of everyday situations
B. Campbell and F. Lubben 239

In the maze of chemical nomenclature – how students name oxo salts
H-.J. Schmidt 253

Thought experiments in science education: potential and current realization
J. K. Gilbert and M. Reiner 265

Enhancing science instruction: the use of 'conflict maps'
C.-C. Tsai 285

Restructuring knowledge in Biology: cognitive processes and metacognitive reflections
B. L. Martin, J. J. Mintzes and I. E. Clavijo 303

The impact of the national curriculum on secondary school science teaching in England and Wales
E. W. Jenkins 325

Vol. 22 No. 4 April 2000

RESEARCH REPORTS

What are the Earth and the heavenly bodies like? A study of objectual conceptions among Norwegian deaf and hearing pupils
I. Roald and Ø. Mikalsen 337

Transformation of didactic intensions by teachers: the case of geometrical optics in grade 8
C. Hirn and L. Viennot 357

The development of an instrument for assessing students' perceptions of teachers' knowledge
H.-L. Tuan, H.-P. Chang, K.-H. Wang and D. F. Treagust 385

Multiple frameworks?: Evidence of manifold conceptions in individual cognitive structure
K. S. Taber 399

Russian/US comparison using the expert science teaching educational evaluation model (ESTEEM)
J. A. Burry-Stock, L. Dorogan, G. F. Varrella and R. E. Yager 419

Science teachers and technology teachers developing electronics and electricity courses together
J. Lavonen and V. Meisalo 435

Vol. 22 No. 5 May 2000

RESEARCH REPORTS

A comparison of year 1 and year 6 students' conceptions of evaporation and condensation: dimensions of conceptual progression
R. Tytler 447

Case studies and generalizability: grounded theory and research in science education
K. S. Taber 469

Epistemological resources for thought experimentation in science learning
M. Reiner and J. Gilbert 489

What happens to the food we eat? Children's conceptions of the structure and function of the digestive system
F. M. Teixeira 507

Addressing student misconceptions concerning electron flow in aqueous solutions with instruction including computer animations and conceptual change strategies
M. J. Sanger and T. J. Greenbowe 521

Conceptions of geological time among primary teacher trainees, with reference to their engagement with geoscience, history, and science
R. Trend 539

Vol. 22 No. 6 June 2000

RESEARCH REPORTS

Upper primary boys' and girls' interests in science: have they changed since 1980?
C. Dawson 557

The disposition toward critical thinking of high school and university science students: an inter-intra Israeli–Italian Study
U. Zoller, D. Ben-Chaim and S. Ron 571

Self-perception, individual learning style and academic achievement by a pair of bilingual twins in a secondary school
N. B. Fouzder and A. J. W. Markwick 583

Representations of indigenous knowledges in secondary school science textbooks in Australia and Canada
P. Ninnes 603

A study of pupils' conceptions and reasoning in connection with 'microbes', as a contribution to research in biotechnology education
L. Simonneaux 619

Consensus projects: teaching science for citizenship
S. D. Kolstoe 645

Vol. 22 No. 7 July 2000

RESEARCH REPORTS

Improving science teachers' conceptions of nature of science: a critical review of the literature
Fovad Abd-El-Khalick and Norman G. Lederman 665

Language as a confounding variable in the diagnosis of misconceptions
Douglas Clark and Margaret Rutherford 703

Children's understanding of substances, part 1: recognizing chemical change
Philip Johnson 719

Conversations of family and primary school groups at robotic dinosaur exhibits in a museum: what do they talk about?
Sue D. Tunnicliffe 739

Rethinking the elementary science methods course: a case for content, pedagogy, and informal science education
Janet Kelly 755

Vol. 22 No. 8 August 2000

INTRODUCTION

Editorial. Special issue: The Knowledge Integration Environment: a preface
John K. Gilbert 779

RESEARCH REPORTS

Designing the Knowledge Integration Environment
Marcia C. Linn 781

Scientific arguments as learning artifacts: designing for learning from the web with KIE
Philip Bell and Marcia C. Linn 797

Scaffolding students' knowledge integration: prompts for reflection in KIE
Elizabeth A. Davis and Marcia C. Linn 819

Teaching science through online, peer discussions: SpeakEasy in the Knowledge Integration Environment
Christopher M. Hoadley and Marcia C. Linn 839

Evaluating media-enhancement and source authority on the internet: the Knowledge Integration Environment
Douglas B. Clark and James D. Slotta 859

COMMENTARY

The Knowledge Integration Environment: commentary on research
Richard T. White 873

Knowledge Integration Environment: reactions and comments
Doris Jorde 881

Designing powerful learning environments and practical theories: the knowledge integration environment
Bat-Sheva Eylon 885

Vol. 22 No. 9 September 2000

INTRODUCTION

Editorial. Special issue: Introduction to model-based teaching and learning in science education
Janice D. Gobert and Barbara C. Buckley 891

RESEARCH REPORTS

Interactive multimedia and model-based learning in biology
Barbara C. Buckley 895

A typology of casual models for plate tectonics: Inferential power and barriers to understanding
Janice D. Gobert 937

An investigation of the knowledge structures of experts, intermediates and novices in physics
Jennifer L. Snyder 979

History and philosophy of science through models: some challenges in the case of 'the atom'
Rosária Justi and John Gilbert 993

A typology of school science models
Allan G. Harrison and David F. Treagust 1011

Biotechnology teaching models: what is their role in technology education?
Bev France 1027

Model based learning as a key research area for science education
John Clement 1041

Vol. 22 No. 10 October 2000

RESEARCH REPORTS

Student absences during learning cycle phases: a technological alternative for make-up work in laboratory based high school chemistry
Edmund A. Marek, David M. Askey and Michael R. Abraham 1055

Interpreting experimental data: the views of upper secondary school and university science students
Jim Ryder and John Leach 1069

Educational reconstruction of physics content to be taught and of pre-service teacher training: a case study
M. L. Aiello-Nicosia and R. M. Sperandeo-Mineo 1085

The effects of STS-oriented instruction on female tenth graders' cognitive structure outcomes and the role of student scientific epistemological beliefs
Chin-Chung Tsai 1099

Memories and scientific literacy: remembering exhibits from a science centre
Maria I. Medved and Keith Oatley 1117

Vol. 22 No. 11 November 2000

RESEARCH REPORTS

Can 'ears-on' help hands-on science learning — for girls and boys?
Priscilla F. Heard, Sally A. Divall and Sandra D. Johnson 1133

Scepticism and gullibility: the superstitious and pseudo-scientific beliefs of secondary school students
Peter F. W. Preece and John H. Baxter 1147

In search of explanatory frameworks: an analysis of Richard Feynman's lecture '*Atoms in motion*'
David F. Treagust and Allan G. Harrison 1157

Students' reasoning about basic chemical thermodynamics and chemical bonding: what changes occur during a context-based post-16 chemistry course?
Vanessa Barker and Robin Millar 1171

Influences on choice of course made by university Year 1 bioscience students – a case study
Isobel J. Robertson 1201

Vol. 22 No. 12 December 2000

CALL FOR PAPERS: SPECIAL ISSUE

The affective dimensions of learning science
Guest editors: Mike Watts and Steve Alsop 1219

RESEARCH REPORTS

Concept maps as assessment in science inquiry learning – a report of methodology
Trish Stoddart, Robert Abrams, Erika Gasper and Dana Canaday 1221

Data-logging in practical science: research and reality
Leonard R. Newton 1247

Predicting the choice of physics in secondary education
Karel M. Stokking 1261

Difficulties in teaching the concepts of 'amount of substance' and 'mole'
Carlos Furió, Rafael Azcona, Jenaro Guisasola and Mary Ratcliffe 1285
